

## KEY INFORMATION DOCUMENT (CFD on Equities)

### Purpose

This document provides you with key information about this investment product. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

### Product: CFDs on Equities

Offered by: A-Conversio Capital Ltd

**You are about to purchase a product that is not simple and may be difficult to understand.**

### Type

Contract for differences ("CFD") are complex and leveraged financial products entered into on a bilateral basis, with the company, and are settled in cash. They are traded 'Over the Counter' ('OTC'), which refers to the process of how securities are traded for companies that are not listed on a formal exchange, between two counterparties.

The profits or losses made on a CFD positions are based on:

- the difference between the opening and closing trade price
- the units traded
- any adjustments in respect of the CFD,
- any holdings costs or commissions relating to the CFD
- the value of the traded instrument

### Trading CFD Objectives

The objective of CFD trading is to allow traders, without owning the actual equity, to gain leveraged exposure to the movement in the value of the underlying equity. With CFDs, you are only required to put in a small portion of the market value of the underlying equity when opening positions. Usually the leverage is specified as a ratio (e.g. 1:30). This indicates that you can trade in amounts that are proportionally higher than you could invest in a CFD.

### Attention to Retail trader's

CFDs are complex, leveraged products which are intended for experienced traders who can understand the risks involved, how the prices of CFDs are derived, the key concepts of margin and leverage, and have the appropriate financial standing in order to bear losses of the entire amount invested.

The summary risk indicator is a guide to the level of risk of this product compared to other products. The indicators level of risk is shown according on how you may experience losses, due to volatility when trading CFDs.

The risk indicator concludes that you may not be able to buy or sell your CFD at the price you wish, due to volatility of the market or you may have to buy or sell your CFD as at a price that significantly impacts your returns

This product has been classified as 7 out of 7, which is the highest risk class. This rates the potential losses from future performance of the product at a very high level.

CFDs are leveraged products that can quickly generate losses due to the underlying's market movement. There is no capital protection against market risk, credit risk or liquidity risk. Your invested capital is not protected, please check our risk disclosure on our website.
